

Fransgård GT-HNZ – Leveller

**MADE IN
DENMARK**

**GT-250HNZ
GT-275HNZ**

Powerful grader blade in two working widths with high base weight and wheels as an option. The blade is heavy made with a 75 mm connection shaft and hydraulic turnable 230° standard. Interchangeable wearing plates is standard. The 3-point hitch has mechanical adjustment for setting the horizontal cutting angle up to 20° and side adjustment. Build for Tractors up to 120 HP.

**New
Model**

Fransgård

The blade can be rotated hydraulically up to 230° and mechanical side adjustment 55 cm left and right. All blades are fitted with reversible cutting edges.

The 3-point hitch has a mechanical setting for the horizontal angle to up to +/- 20°. It is build after the same principle as our Professional Grader GT-DKH.

Wheels can be easily set and rotated 360°, which allows the possibility of reversing the cutting edge without turning the blade. OPTION.

More simple wheel system, with bolt adjustment of the height, is also an OPTION.

The three-point hitch offers two options for adjusting the lift arms as well as a top bar bracket with one fixed holes. It also has an oval groove, which allows it to follow the terrain more effectively.

Large selection of options are available: Hydr. Offset, hydr. Setting horizontal, Snow blades, edge blades, shock valve with or without accumulator, rubber cutting edge.
